

Project Initialization and Planning Phase

Date	01 October 2026
Team ID	SWTID-2026-4890
Project Title	LegalEase – AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

LegalEase is an AI-assisted platform for creating structured first drafts of common legal documents. Users enter key details, the system validates them, generates a draft using Gemini, provides an editable preview, and supports TXT, DOCX and PDF export.

Project Overview

Objective	Simplify routine legal-document drafting through guided inputs, AI-assisted generation, validation, editing and professional formatting.
Scope	Common drafts such as NDAs, employment contracts, lease and service agreements; reusable templates/clauses; AI generation; preview, editing and export.

Problem Statement

Description	Non-lawyers may struggle with terminology, structure, clause selection and formatting. Manual drafting and static templates can be slow or difficult to customize.
Impact	Reduces repetitive drafting effort and improves preparation workflow while keeping final review with the user or qualified professional.

Proposed Solution

Approach	Streamlit interface + FastAPI/Pydantic validation + Gemini structured generation + document formatting modules for TXT, DOCX and PDF.
Key Features	• Guided inputs and document types • Template/clause-based generation • Editable preview and export • Input/output validation and security controls • Human review before final use

Resource Requirements

Resource Type	Description	Specification / Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	Development laptop/desktop; optional cloud CPU. GPU not required for API-based generation.
Memory	RAM specifications	8 GB minimum; 16 GB recommended for development.
Storage	Disk space for data, models, and logs	10 GB+ free space; cloud storage optional.
Software		
Frameworks	Python frameworks	FastAPI + Uvicorn; Streamlit
Libraries	Additional libraries	google-genai, pydantic, python-docx, fpdf, Pillow, requests, python-dotenv
Development Environment	IDE	VS Code / PyCharm; Python 3.10+; virtual environment
Data		
Data	Source, size, format	Legal document templates, user inputs, PDF/ DOCX/ TEXT
