

Scalability & Future Plan

Date	02 OCTOBER 2026
Team ID	6ab7f7bfd083b0e2ee72b13b
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited scalability for a large number of concurrent users	Increased users may result in slower response times during document generation and other operations.	High
2	Limited document and user data storage capacity	As the number of generated legal documents and users increases, storage and data management requirements will also increase.	Medium
3	Limited range of legal document types and advanced features	Users may not be able to generate every type of legal document or access advanced legal assistance features.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Designed primarily for the current project's expected user base.	Deploy the application on scalable cloud infrastructure and use load balancing and horizontal scaling to support more concurrent users.
2	Data Storage	Stores user-related information and generated legal documents using the current application storage/database setup.	Use scalable cloud database and object storage solutions with automated backup and document archival.

3	Performance	Document generation and application processing are suitable for the current prototype and expected workload.	Introduce caching, optimized database queries, asynchronous processing, and API optimization to improve response time.
4	Security	Basic authentication and application-level security mechanisms are implemented.	Strengthen authentication, authorization, encryption, secure API access, audit logging, and regular security testing.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Core Legal Document Generation	Current / Initial Release	Provides users with a simple platform to generate legal documents based on their requirements.
Phase 2	Expanded Legal Document Library	3–6 Months	Supports more legal document formats and use cases, increasing the usefulness of LegalEase.
Phase 3	Advanced AI & Personalization	6–12 Months	Improves document generation through better AI assistance, personalized templates, document recommendations, and enhanced user interaction.
Phase 4	Cloud Scalability & Legal Service Integration	12+ Months	Enables large-scale usage, improved availability, stronger security, and potential integration with additional legal services and platforms.
