Project Name	LegalEase – AI - Powered Legal Document Generator
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

LegalEase-code/

```
|
|
|— .dockerignore
|— .env.example
|— .gitignore
|— Dockerfile
|— Procfile
|— README.md
|— docker-compose.yml
|— render.yaml
|— requirements.txt
|— requirements-dev.txt
|
|— .streamlit/
|   |— config.toml
|
|— assets/
|   |— icon.png
|   |— logo.png
|   |— logo_light.png
|
|— backend/
|   |— __init__.py
|   |— config.py
|   |— main.py
|   |— models.py
|   |— routes.py
|   |
|   |— ai_core/
|       |— __init__.py
|       |— document_types.py
|       |— exceptions.py
|       |— gemini_generator.py
|       |— prompts.py
|       |
|       |— services/
|           |— __init__.py
```

```

```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://legalease-v0ol.onrender.com/
Login Credentials (Demo)	Not required-Public demo access
Platform / Hosting Provider	Render
Repository Link	https://github.com/Bavasrikumaran-Gcesalem/LegalEase-AI-Powered-Legal-Document-generator.git
Demo Video Link	https://drive.google.com/file/d/1emfpJb0TqOp5GHovhDImFl6fDa_Rlv31/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Python 3.10 or above
- Git
- Internet connection
- Google Gemini API key

Step 1: Clone the repository using the GitHub repository link.

Step 2: Create and activate a Python virtual environment using
python -m venv venv and venv\Scripts\activate.

Step 3: Install the required dependencies using *pip install -r requirements.txt*

Step 4: Configure the environment by copying .env.example to .env and adding the Gemini API key.

Step 5: Start the application using *streamlit run frontend/app.py*

Step 6: Open the application in a web browser at <http://localhost:8501>

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini API key is required for document generation.	Configure the API key in .env.
2	Generated content depends on user inputs and AI output.	Review and edit the generated document before use.
3	Current deployment is local.	Cloud deployment can be added in future.
